SUMMARY

Software Engineer with hands-on experience in ASP.NET Core Web API, Angular, and CI/CD pipelines for automated build and deployment. Experienced in Docker containerization and AWS cloud deployments through project work. Passionate about clean code, continuous learning, and building scalable web applications. Currently looking for opportunities to leverage technical skills and experience as a Software Engineer

EDUCATION

Bachelor of Science in Information Systems

(2023–2026)

University of Colombo School of Computing

WORK EXPERIENCE

Software Engineering Intern - Scienter Technologies (Pte) Ltd

Dec 2025 - June 2026

- We used ASP.NET Core framework to develop a RESTful Web API backend with clean architecture, business logic, and database operations..
- Developed and implemented multiple CRUD operations across several modules/pages.
- Worked on micro-frontend architecture, exposing reusable components for integration across multiple projects.
- Contributed to building an element-based reusable component project, enabling component sharing across different applications.
- Designed and created new Stored Procedures where required, and also converted existing SP logic into C Sharp backend services to support hybrid implementation between database and application layers.
- Collaborated with development teams to enhance system architecture and support project-level integration requirements.

PROJECTS

Foodie - Restaurant Management System

– *Technologies: Next.js, NestJS, Prisma, PostgreSQL, Docker, AWS, CI/CD*

- Developed a responsive restaurant web application using Next.js for the frontend and a NestJS backend with RESTful API endpoints.
- Implemented secure user authentication and authorization using JWT and bcrypt.
- Designed and integrated Prisma ORM models for efficient database operations with PostgreSQL.
- Containerized the application using **Docker** for consistent development and deployment.
- Deployed the application on Amazon Web Services (**AWS**), hosting both the frontend and backend.
- Configured and implemented a **CI/CD** pipeline to automate build, testing, and deployment processes.
- [GitHub Repository](#)

Trade Track - E-commerce management system

– *Technologies: HTML, CSS, PHP, JavaScript, MySQL, Figma, Draw.io*

- Developed a web application aimed at connecting local shop owners, manufacturers, and customers in the spice supply chain, improving efficiency and transparency of transactions in Sri Lanka.
- Implemented role-based access control with JWT authentication for users and administrators.
- Built RESTful API with 35+ endpoints for products, manufacture, shop owners, agents and Admin.
- [GitHub Repository](#)

Chat App

– *Technologies: Flutter, Firebase, Figma*

- Built a secure one-on-one chat application where users connect via QR code scanning, ensuring privacy-focused communication with a simple UI.
- [GitHub Repository](#)

Club Sync Web - Club volunteers management System

- *Technologies: React, Next.js, Tailwind CSS, PostgreSQL, Figma, Draw.io*
- Developed a responsive platform connecting volunteers with clubs, event sign-ups, and coordinator communication.
- Implemented secure user authentication and authorization using JWT and bcrypt.
- Designed and integrated Prisma ORM models for efficient database operations using PostgreSQL with Neon as the cloud database provider.
- [GitHub Repository](#)

TECHNICAL SKILLS

Language: C, Sql, Php, HTML/CSS, JavaScript, TypeScript, Java, C Sharp, Dart.

Framework: React, Next.js, NestJS, .NET, Angular, Flutter, ReactNative

Databases: MySQL, PostgreSQL, MSSQL.

DevOps/Cloud: Docker, AWS, CI/CD Pipelines, Neon.

Tools: Git, GitHub, Visual Studio, VS Code, Postman, Figma, Swagger, TFS.

EXTRA CURRICULUM

Member of the Football team at the University of Colombo school of computing
Content Creator- Created poems for Pahasara's media content, adding an artistic.
Member of University of Colombo school of computing media team
Member of Student Union, University of Colombo School of Computing
